HETU VINODKUMAR PRAJAPATI

Ahmedabad, Gujarat | hetu2286@gmail.com | linkedin.com/in/hetu-prajapati-389b93343 | github.com/hetuprajapati22

PROFESSIONAL SUMMARY

Computer Engineering undergraduate (B.Tech, CGPA 8.5/10) with hands-on experience building and deploying web applications using Python, Flask, JavaScript, HTML5, and CSS3. Comfortable owning a project end to end: backend logic and routing, frontend design, and live deployment on Render and GitHub Pages. Currently building a real-time multiplayer app with React.js and Supabase. Seeking a Web Development or Python Development Internship to contribute to real-world projects and grow as a developer.

EDUCATION

Gandhinagar University **Expected 2028**
Bachelor of Technology (B.Tech) in Computer Engineering | CGPA: 8.5 / 10.0

N.V. Patel Vidhyamandir **2023**
Higher Secondary Certificate (HSC)

Ankur Vidyalaya **2021**
Secondary School Certificate (SSC)

TECHNICAL SKILLS

Languages: Python, JavaScript
Frontend: HTML5, CSS3, React.js (learning, used in LoveBug), Responsive Design, CSS Animations
Backend: Flask, REST-style Routing, Jinja2 Templates
Database: MySQL, PostgreSQL (via Supabase)
Tools & Platforms: Git, GitHub, VS Code, Render, GitHub Pages, Supabase
Core Concepts: OOP, DBMS, Data Structures & Algorithms (Fundamentals), Debugging

PROJECTS

The Cozy Table – Café Management System | Python, Flask, HTML, CSS
Live Demo: https://hetuprajapati-the-cozy-table.onrender.com

- Wrote the core Python logic and Flask routing for managing café operations: menu management, customer orders, bill generation, and order-related calculations.
- Integrated frontend pages using Flask templates, HTML, and CSS.
- Uploaded the project to GitHub and deployed it on Render as a live web application.

LoveBug – Real-Time Multiplayer Couples Game (In Development) | React.js, JavaScript, HTML5, CSS3, Supabase

- Designed the concept, game rules, synchronization behavior, and user experience for a web game where two partners play together from separate devices.
- Planned features: Google authentication, private couple rooms, three games (This or That, How Well Do You Know Me?, Truth or Dare), synchronized question flow, levels, scoring, and game history.
- Using React.js and Supabase (PostgreSQL) for the planned real-time synchronization and data storage.

TomatoGuard AI – Plant Disease Detection Website (Team Project) | HTML5, CSS3, JavaScript
Live Demo: https://hetuprajapati22.github.io/plant-disease-detection-system

- Developed the frontend for an AI and agriculture project that helps farmers and plant owners identify tomato plant diseases; backend and ML work handled by teammates.
- Deployed the website on GitHub Pages, coordinating with team members on the overall project.

StudyNest – Student Productivity Website | HTML5, CSS3, JavaScript
Live Demo: https://hetuprajapati22.github.io/StudyNest/

- Identified a common student problem and planned the requirements for a website that organizes college timetables and study planning in one place.
- Built the site with HTML, CSS, and JavaScript and published it on GitHub Pages.

CERTIFICATIONS

- Python for Data Science – Skill India Digital
- Python Programming – Skill India Digital
- Front-end Web Development – Skill India Digital

EXTRACURRICULAR ACTIVITIES

Event Volunteer – TechXtreme 2026 | Gandhinagar University

- Supported event coordination, participant assistance, and logistics for a technical symposium.
